## Teralux Smart Doorbell Proview

TERALUX Smart Wall Switch is a modern touch-panel switch designed to control lighting and other smart home devices through the Smart Life or Tuya app. Available in both Zigbee and Wi-Fi variants, it integrates seamlessly into a wide range of smart home ecosystems. Its capacitive touch panel offers precise responsiveness and a sleek, elegant appearance, making it suitable for both residential and commercial installations.

### Features

Manage lights and connected devices directly from the Smart Life or Tuya app anytime, anywhere.

Choose Zigbee or Wi-Fi versions to match your smart home setup and ensure smooth integration.

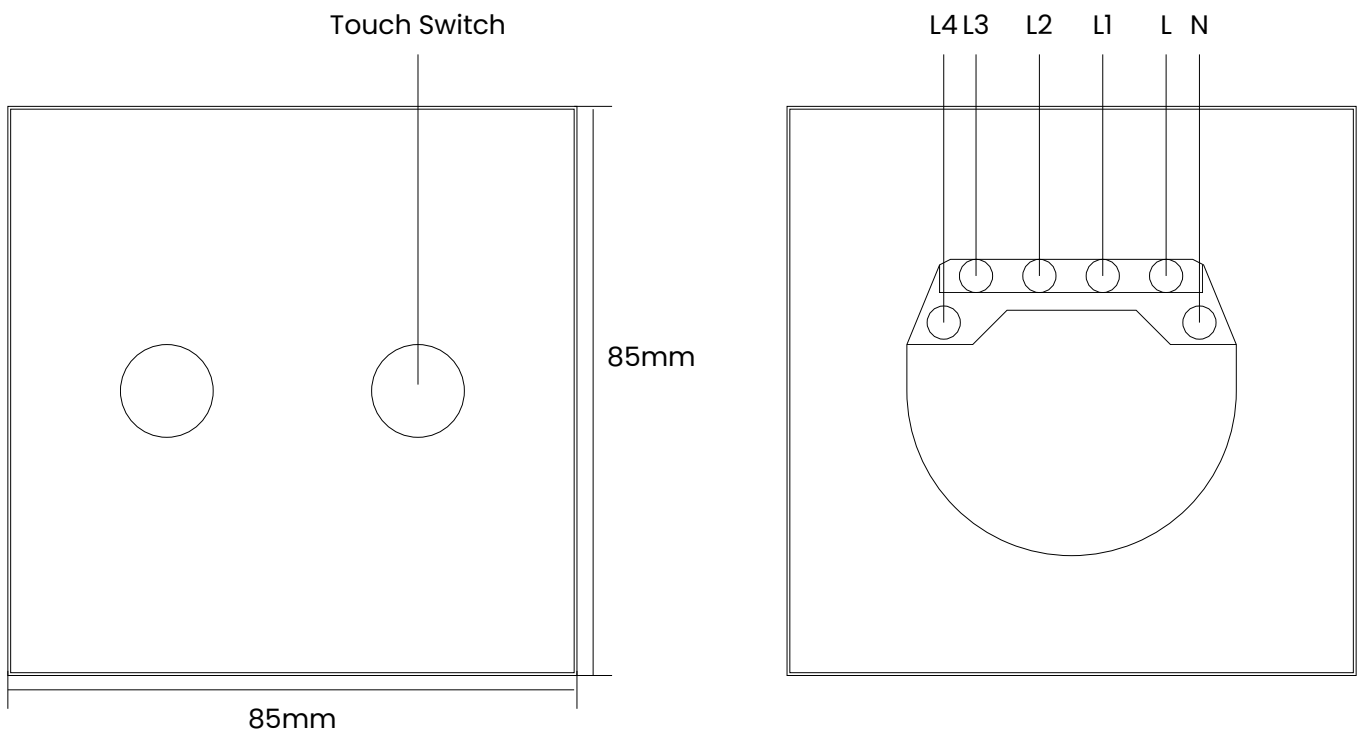

Capacitive touch surface delivers faster, more accurate responses with a clean, premium look.

Supports schedules, timers, and automation scenes to simplify daily routines.

Compatible with Alexa and Google Assistant for hands-free switching and convenience.

Designed for residential or commercial use with a minimalist style that fits most interiors.

### Dimension & Attributes

# Technical Parameter

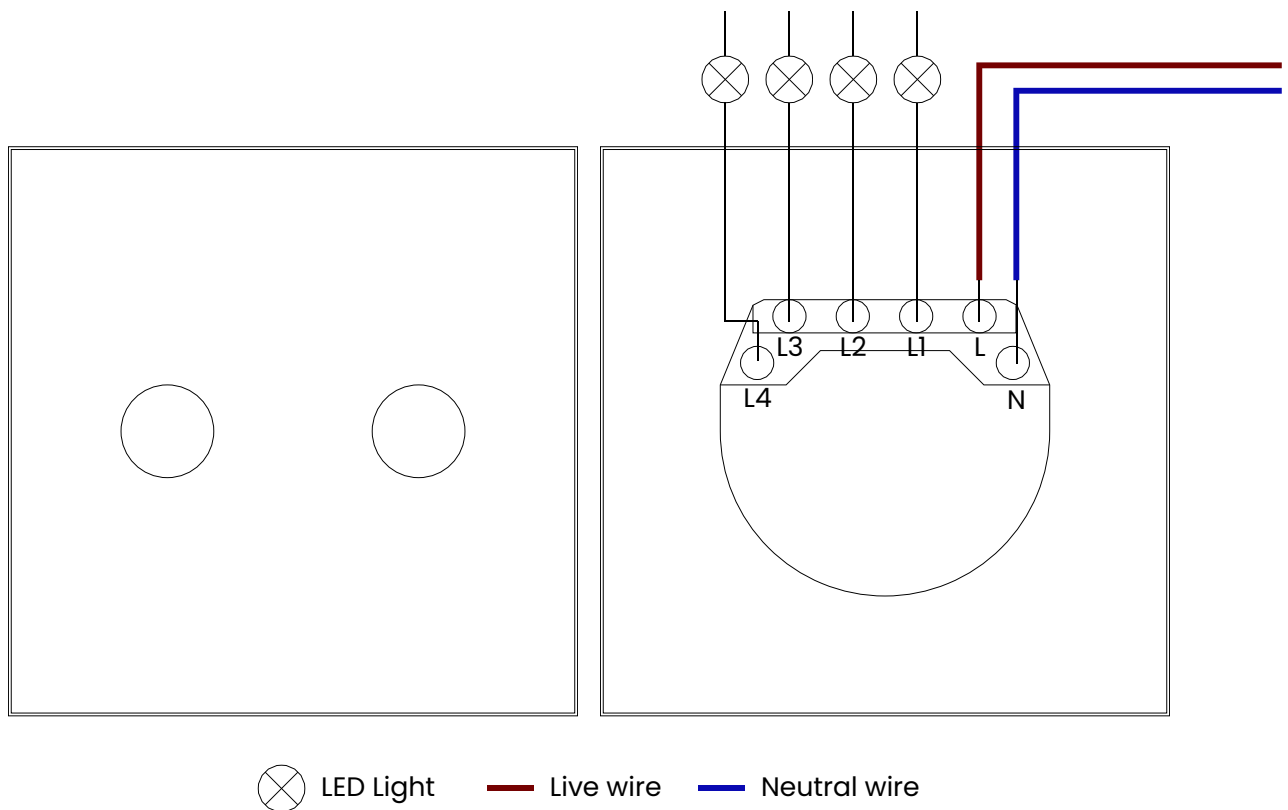

## Parameter

## Specification

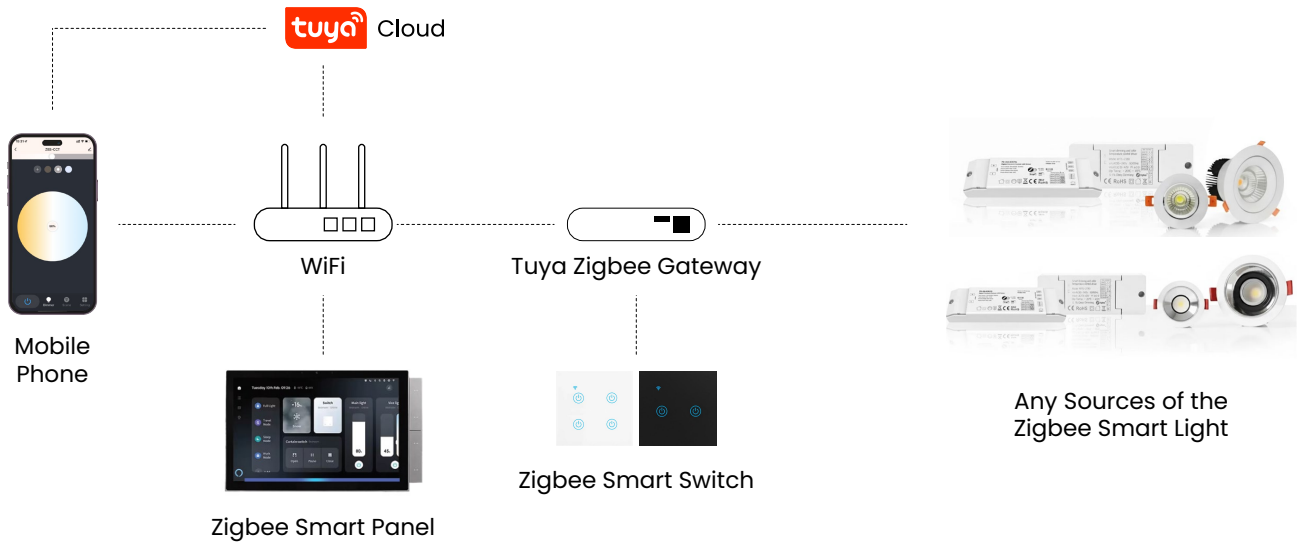

Input Voltage	110–240V AC, 50/60 Hz
Wireless Protocol	Zigbee / Wifi
Interface	Capacitive Touch Panel
Control Method	Remote control via mobile app
Functions	Lighting control and smart home device integration

## Wiring Diagram

The diagram shows how to connect the smart touch switch to four lighting loads (L1–L4). Each load wire is connected to its corresponding output terminal, while the live wire (L) feeds power into the switch. The neutral wire (N) connects from the power source to the switch and continues to each light. LED indicators show the line, load, and neutral connections for easy installation.
